WORK EXPERIENCE

MERN Developer

Eserafsoft solutions, Mohali

06/2023 - 08/2025

Mohali

I work at a company where we build web applications that are used by real users every day. My role involves working with MongoDB, Express, React, and Node to create both the frontend and backend parts of the apps. I collaborate with the team to add new features, fix bugs, and make sure everything runs smoothly. It's been a great experience learning new tools and improving the way we deliver products.

PROJECTS

Coin Finance

- A blockchain powered platform aimed at empowering communities while offering financial services. As it's a growing site and with a lot of live users. Built on React 18 with web3.js and Wallet connect Integrations with the backend structure on Node.js. Visit: <https://empowercoin.finance/>

Revolvr Retailer

- A free shopify app to streamlined the product consignments from brands to the retailer. This app is also live and can be found on the shopify stores. Built with shopify remix scaffold and webhooks for order trackings within the shopify.

ExpressW

- An Indrive clone where backend is managed in Node.js with the socket.io for the realtime updates with the frontend and collaborative approach for the realtime environments with paypal and escrow integrations.

Collab Head

- A collaborative site for the product teams to directly engage with there clients without relying on the third party and directly work on feedbacks provided by the customers. This app is built on Next.js and backend is managed by Django. Visit: <https://lionshead.tidera.ai/>

BlackPatch

- Blackpatch is an ios app that connects apple device owners with on demand repairs ,maintainence and diagnostic services. The app is currently live and have active users more than 15k, with app generating revenue around half a million dollar. Visit: <https://blackpatch.app/>

EDUCATION

CERTIFICATIONS

IOT/ML Certification (NIELIT) (01/2022 - 08/2022)

This is start of my journey into the coding as I started with the machine learning and raspberry pi with python after which I switched to web development as its aligning more with my vision.

JS Certification (oops info sol.) (01/2023 - 06/2023)

From the basics to the advance js concepts all started from here. Spent 6 month of my time dedicating to the js and learnt react, next and vue. Further while in my job time I was introduced to Node which it took 2 weeks to grasp on.
